## FLUIDO S / D

Special water-based dielectric fluids for EDM drilling machines.

- FLUIDO S is indicated for the processing of non-ferrous metals and their alloys
- FLUIDO D is indicated for the machining of steel, tungsten carbide and sintered materials
- It is recommended not to mix the two fluids with each other or with other products not to deteriorate the performance
- Supplied in 200 lt drums or 20 lt tanks

Product	Surface tension at 20 C ° (dyn / cm)	Electrical conductivity at 20 C ° (µs)	Density at 20 C °
FLUIDO S	38	700	0,98 - 1,02
FLUIDO D	43	1050	0,98 - 1,02
