BRASS X

General indications

- Coated copper wire, produced with high quality raw material
- Usage recommendations: the wire can be used on Charmilles machines with the appropriate technology

Technical characteristics:

- Alloy: Cu-ETP - 2.0065
- Coating: CuZn alloy
- Diameter tolerance: 0 / -0.002 mm
- Tensile strength: 500 N / mm²
- Conductivity: > 80% IACS

Compliance:

- We certify that the wire is checked and complies with the technical specifications and declared tolerances.
