CLEANING SPRAY

Usage information:

This cleaning product is specifically indicated for cleaning EDM machines tanks.

It does not contain hydrochloric acid, but effectively removes dirt residues without corroding.

The parts to be cleaned only need to be sprayed and the product takes effect after a short time.

Then they must be rinsed but without using water from the machine circuit as foam can form.

The paint of the machine is not affected.

Equipment

Contains phosphoric acid

H290 Can corrode metal / H314 Causes eye irritation / H319 Can cause eye damage
