HITACHI HBZ-U

General indications

- High cutting speed thanks to the zinc-rich alloy
- Improved automatic threading capacity thanks to its high straightness
- Can be used on all wire machines with automatic wire threading (AWT)
- Mounted as original equipment on Fanuc, Sodick, Makino

Features techniques:

- Alloy: JIS C 2800 (Cu 60% Zn 40%)
- Diameter tolerance: ± 0.001 mm
- Tensile strength: > 980 N / mm²
- Elongation: $> 0.4\%$

Compliance:

- We certify that the wire is checked and conforms to specifications techniques and the declared tolerances.
