NANOCOAT - J2

General Information

- Offers the coated wire technology optimized for the Japanese machines, without changing the original parameters
- High cutting speed
- Same surface quality as brass wire

Specifications :

- Core: Brass, Cu 60% Zn 40%
- Coating: Beta CuZn + Gamma CuZn
- Diameter tolerance: 0 / -0.002 mm
- Diameter ovalization: < 0,0015 mm
- Breaking load: 900 N / mm²
- Elongation: > 2%
- Conductivity: 24% IACS

Recommendations of use:

- Use on: all Japanese machines.
- Recommended applications: General mechanics, dies and tools.
- Materials: steel, copper, tungsten carbide, aluminum, nickel, titanium, PCD
